

ALUMINIUM

Packing, transport and storage of sensitive chemicals

- POWDER PRODUCTS
- VISCOUS PRODUCTS

O220™ CANISTER open head

The O220™ Open Head Canister is made of 1050A grade monobloc aluminum and available in sizes from 2.5L to 30L. The O220™ not only guarantees an optimal tightness, but also a high level of chemical, microbiological and particle cleanliness and is therefore recommended for packing, storage and transport of sensitive chemicals.

MAIN USES

Pharmaceutical and chemical powders, liquid crystal raw materials, solid perfumery raw materials (jasmine and rose concrete, iris butter...).

O220™ CANISTER

open head

SAFE

- Secured transport with a lever lock ring closure, nitrile (or silicone) gasket and aluminum lid.
- High resistance and tightness ensured even when exposed to high pressure differences.
- Compatible with anti-tamper seals.
- No residue after use.

USER FRIENDLY

- Easy to use and to empty with its 220mm wide open head.
- Easily washable and sterilizable.
- Reclosable.

RECYCLABLE

- 100% recyclable aluminum.

O220™ OPEN HEAD CANISTER RANGE

Capacity	Quantity per box	Quantity per pallet	Body Diameter (mm)	Height with closure (mm)	Height without closure (mm)	Weight (g)
